

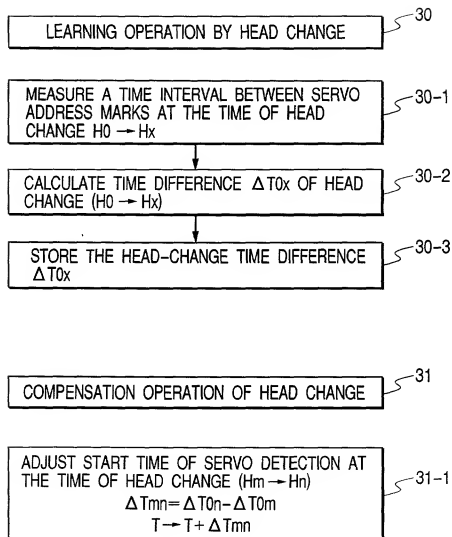

FIG. 1

LEARNING OF THE AMOUNT OF HEAD SKEW
OF SERVO SIGNAL AREA

1007782.022002

FIG. 2

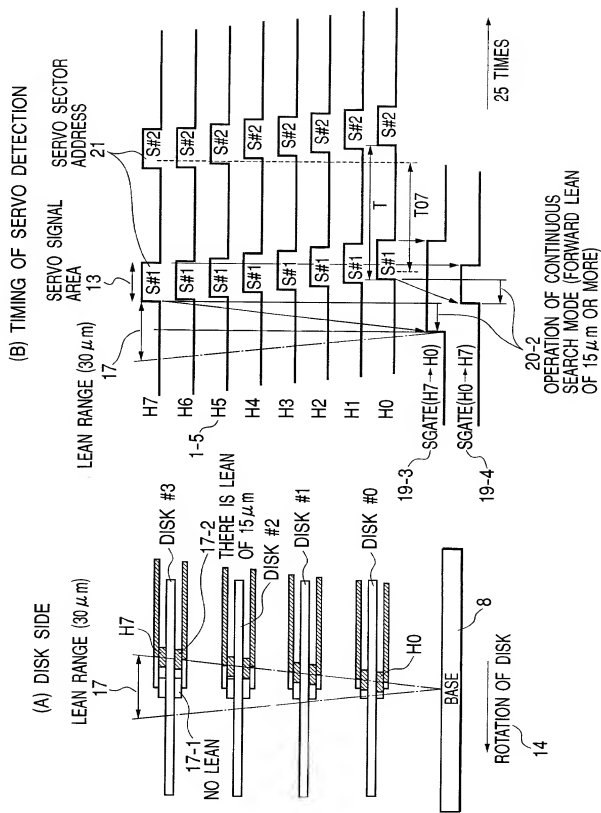

FIG. 3

LINEAR MODEL (THICKNESS OF DISK=INTERVAL BETWEEN HEADS)

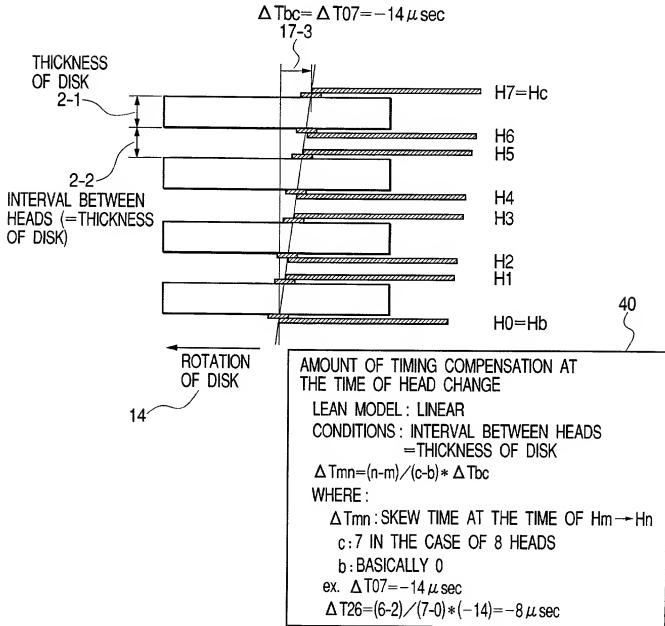

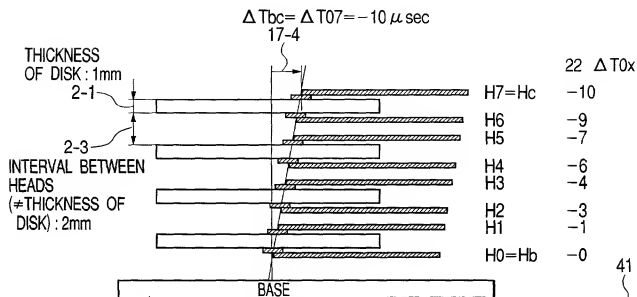

FIG. 4

LINEAR MODEL (THICKNESS OF DISK ≠ INTERVAL
BETWEEN HEADS)

AMOUNT OF TIMING COMPENSATION AT
THE TIME OF HEAD CHANGE

LEAN MODEL : LINEAR

CONDITIONS : INTERVAL BETWEEN HEADS AND
THICKNESS OF DISK ARE ARBITRARY

$$\Delta T_{mn} = (L_n - L_m) / (L_c - L_b) * \Delta T_{bc}$$

ex. $\Delta T_{26} = (9-3) / (10-0) * (-10) = -6 \mu \text{sec}$

WHERE :

L_c : DISTANCE FROM BASE TO HEAD
ON CASE SIDE

L_b : DISTANCE FROM BASE TO HEAD
ON BASE SIDE

L_x : DISTANCE FROM BASE TO H_x

CALCULATION OF ΔT_{mn} BY LEARNING

$$\Delta T_{mn} = \Delta T_{0n} - \Delta T_{0m}$$

ex. $\Delta T_{26} = (-9) - (-3) = -6 \mu \text{sec}$

FIG. 5

NONLINEAR MODEL (SQUARE CURVE)

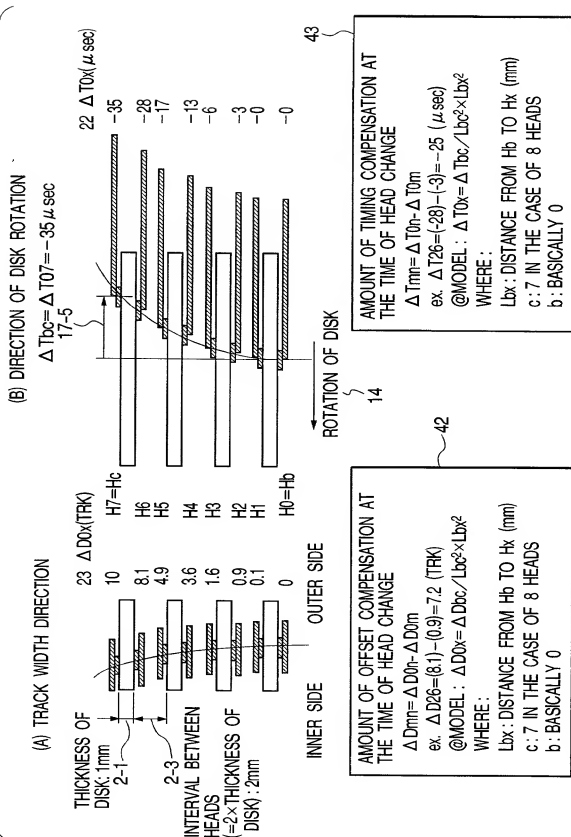

FIG. 6

DISK SLIP+HEAD SKEW

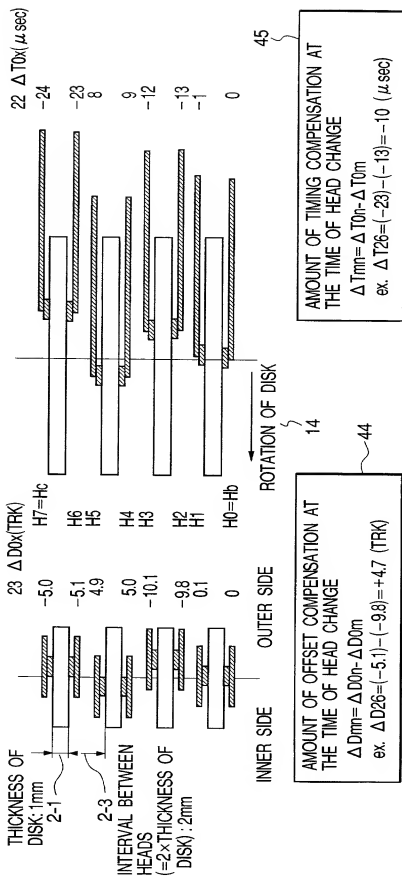

FIG. 7

APPLICATION OF ONE PRE-STW DISK
BY MEDIA PREWRITE STW

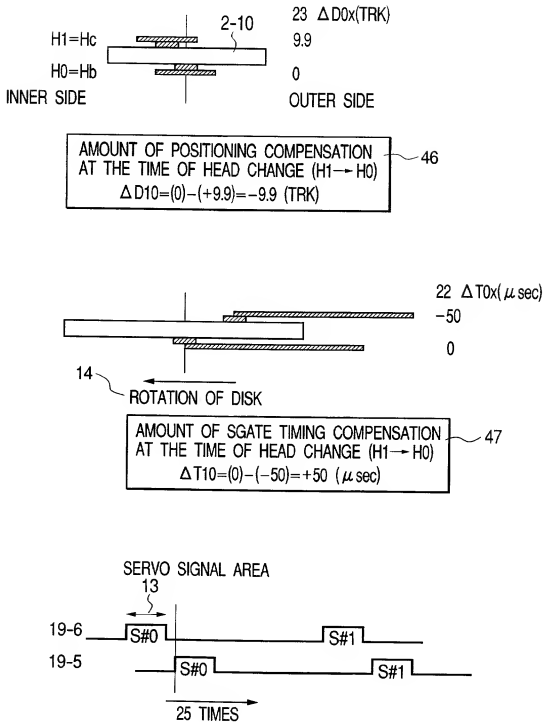

FIG. 8

APPLICATION OF TWO PRE-STW DISKS
BY MEDIA PREWRITE STW

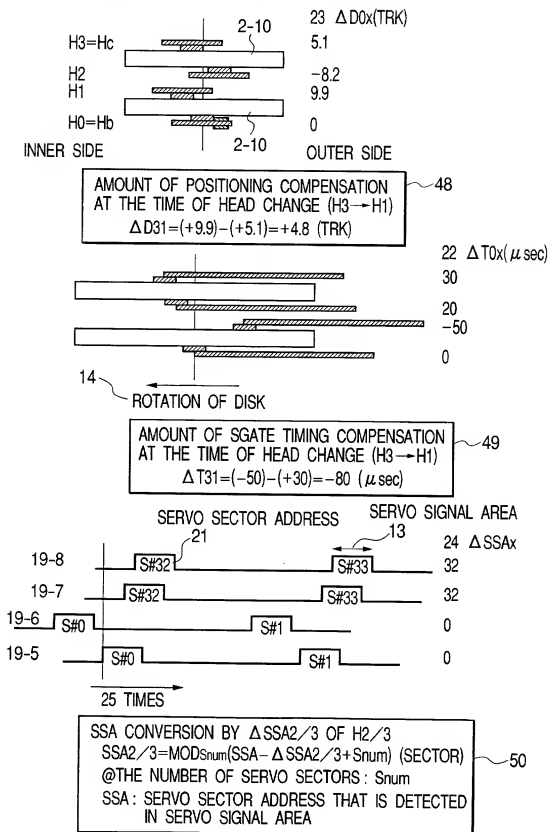

FIG. 9

APPLICATION OF TWO PRE-STW DISKS BY PATTERNED
DISK AND MAGNETIC PRINTED MEDIA STW

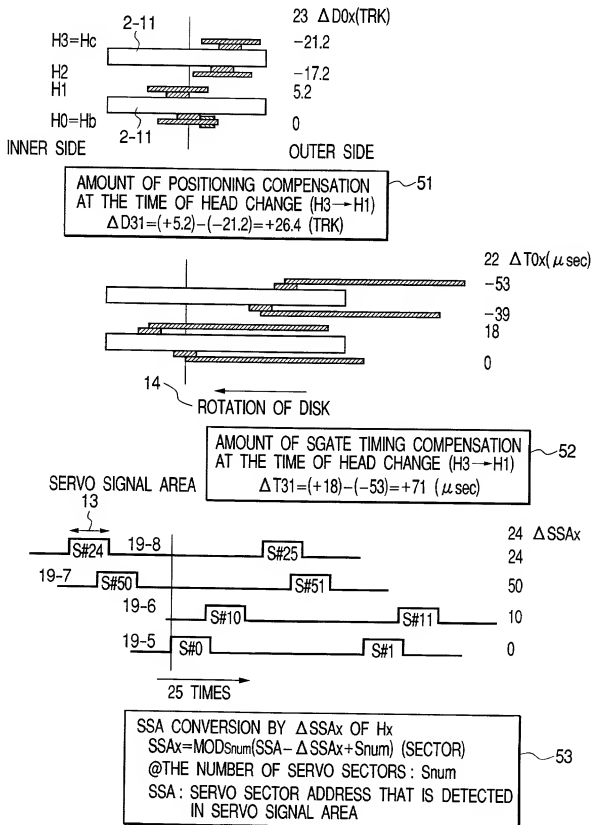

FIG. 10

APPLICATION OF FOUR PRE-STW DISKS BY PATTERNED DISK AND MAGNETIC PRINTED MEDIA STW

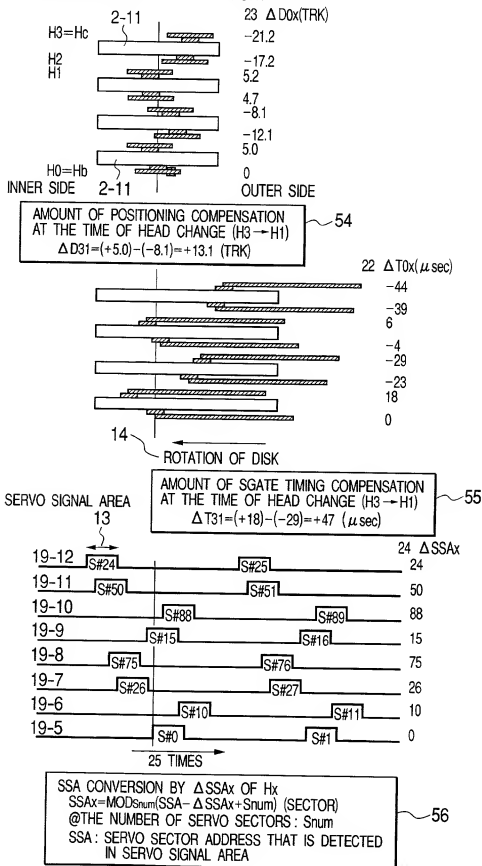

FIG. 11
CONFIGURATION OF HDA

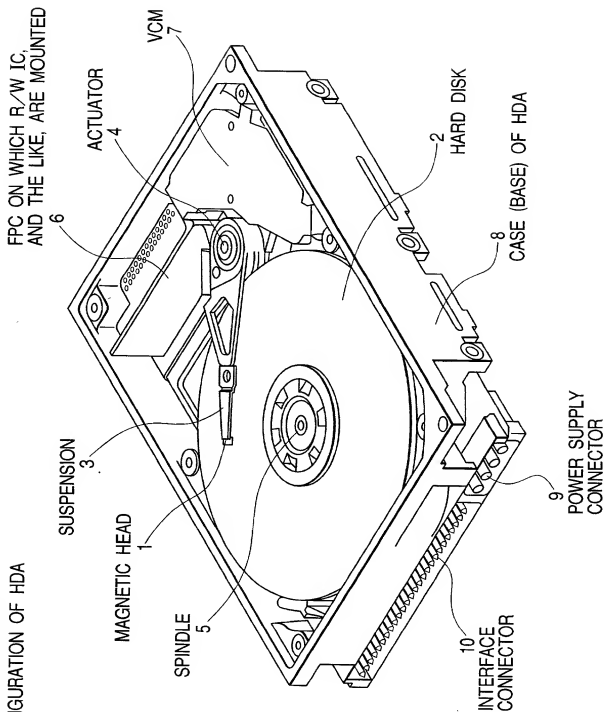

FIG. 12
CONFIGURATION OF HDD

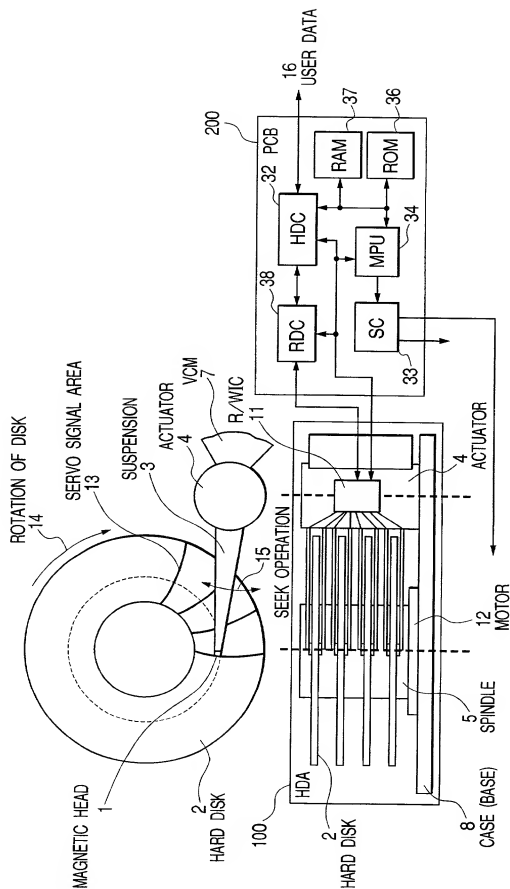

FIG. 13

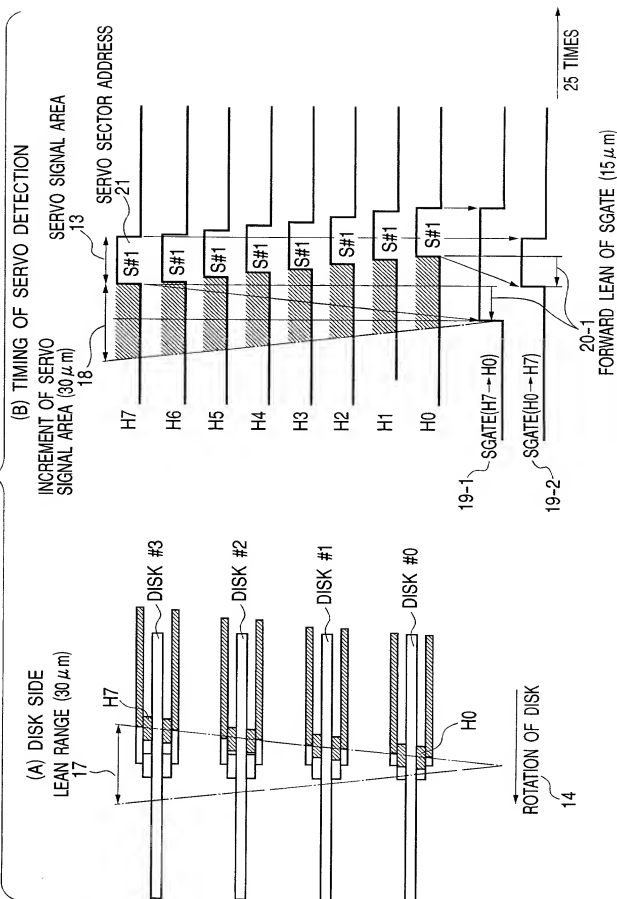

FIG. 14

LEARNING OF THE AMOUNT OF HEAD
SKEW OF SERVO SIGNAL AREA AND
THE AMOUNT OF TRACK OFFSET

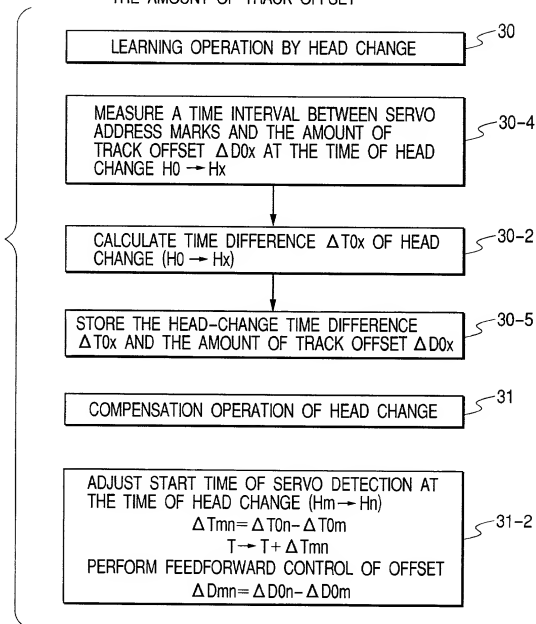

FIG. 15

LEARNING OF THE AMOUNT OF HEAD SKEW
OF SERVO SIGNAL AREA, THE AMOUNT
OF TRACK OFFSET, AND SECTOR SKEW

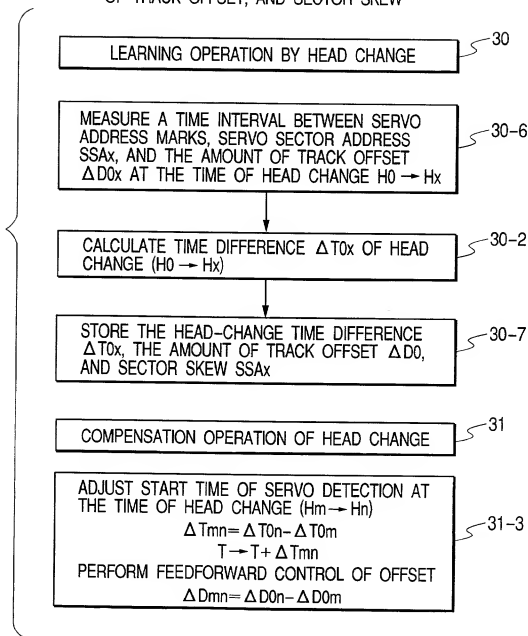

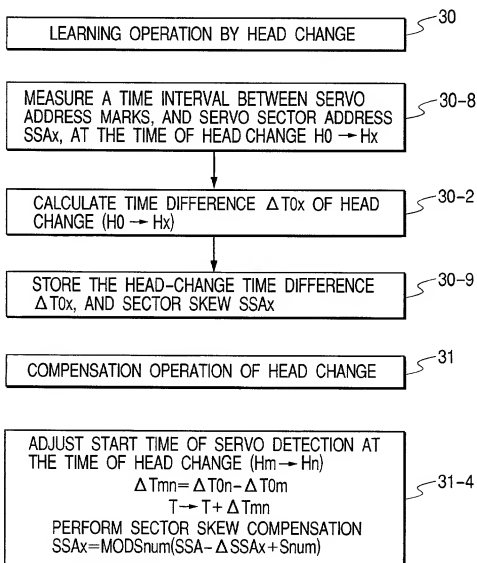

FIG. 16

LEARNING OF THE AMOUNT OF HEAD SKEW OF
SERVO SIGNAL AREA, AND SECTOR SKEW

1007736.02200

FIG. 17

TWO DISKS BUILT INTO MOBILE COMPUTING DEVICE

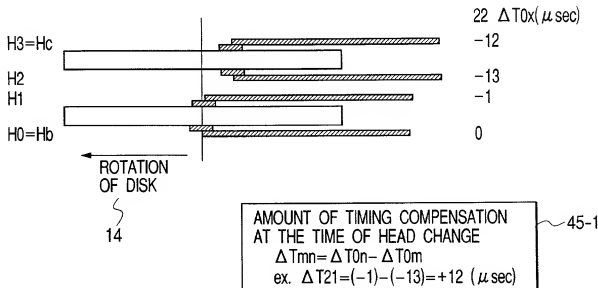

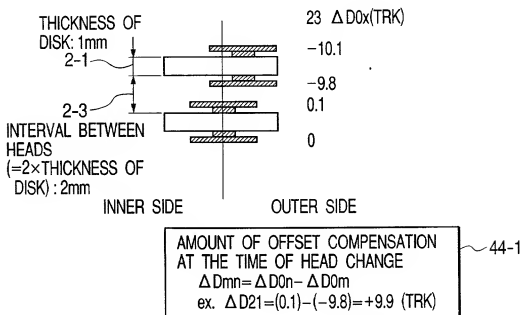

FIG. 18

APPLICATION OF ONE PRE-STW DISK BY PATTERNED
DISK AND MAGNETIC PRINTED MEDIA STW
